

EXPERIENCE

OpenMined | UX Designer (MHCI Capstone)

Jan – Aug 2026

AI privacy & data-security nonprofit

- Led UX research and design for Kindred, a privacy-preserving peer support AI platform for chronic-condition patients - designing core features including verified peer matching, granular consent controls, and a clinician-facing trust layer
- Ran 65 patient, clinician, and SME interviews, 50 speed-dating intercepts, and co-design sessions (11 participants), using a weighted decision framework to narrow 36 candidate use cases to one concept, the “Informed Patient” - tested at 8/10 (patient) and 8.5/10 (clinician) recommendation scores
- Presented the product direction and roadmap to OpenMined's CEO and Principal Engineer, who took the approach forward for continued development with features including Community QA, Timeline of You, Learning Modules, and AI Search

Hydrific (LIXIL) | Lead UX Designer

Mar 2024 – Jun 2025

IoT smart-home hardware startup

- Led design across the product's core flows - onboarding, multi-home management, and usage analytics - taking full design ownership as the team scaled
- Onboarded two designers to the team
- Partnered directly with the CEO and Creative Director on the company website; presented UX strategy to executives, investors, and stakeholders across three company reorganizations
- Led design through a successful product launch - \$114K+ raised on Kickstarter (2024), 15,000+ users at retail today - recognized with the Outstanding Achievement Award, Grand One 2025 Gold Award (Best UX Design), and CES 2025 Innovation Awards Honoree

Senior Specialist – UX Designer

Apr 2022 – Mar 2024

- Designed the IoT water-monitoring product end-to-end from pre-launch, translating raw sensor data into a simple usage and leak-detection dashboard
- Redesigned the onboarding flow (device setup through OAuth and Bluetooth/WiFi pairing) through ~30 user interviews and 100+ usability tests, cutting installation time by 20 minutes
- Built the product's design system from scratch and led Figma prototyping in collaboration with a second designer

MeditationWise | Co-Founder & Lead Designer

Jun 2021 – Present

Meditation & wellness app (startup)

- Co-founded MeditationWise and led the pivot from a web-only product to mobile, targeting a younger demographic to grow the user base
- Designed the app's core flows and full design system from scratch, partnering with the engineering team to ship to the App Store and Google Play
- Ran usability testing and 30+ user interviews to refine onboarding, navigation, and interface flows
- Built a content database of 60+ guided meditations across guided, steps-only, and timer-audio formats

EDUCATION

Carnegie Mellon University — Master of Human-Computer Interaction

Sep 2025 – Aug 2026

Northwestern University — MS, Information Design & Strategy

Sep 2024 – Aug 2025

New York University — BS, Integrated Digital Media, Minor in Psychology

Sep 2018 – Jul 2021

SKILLS

Research & Strategy: User Interviews, Usability Testing, Product Strategy, Affinity Diagramming, Card Sorting, Data Analysis, A/B Testing

Design & Systems: Interaction Design, Information Architecture, Design Systems, Wireframing, Prototyping, Accessibility (WCAG), Design Handoff

Technical & AI: HTML/CSS, JavaScript, Generative AI / Predictive AI, Prompt Engineering

Tools: Maze, Webflow, Axure, UserTesting, Vercel, Google Stitch, Framer, GitHub, Adobe Suite, Zeplin, Claude Code, Codex, Cursor, Moonchild AI, Runway ML, Jira, Notion, Dovetail, v0, Lovable AI
